

PROCUREMENT

We have a Trust-wide procurement strategy that encompasses the ethos and values of CIT. The strategy focuses on high quality and best value for money while delivering services specifically required within individual schools.

- We negotiate centralised single school, multi school and Trust- wide contracts that deliver savings through economies of scale and fixed pricing.

- We provide support to schools advising, assisting and leading on tendering requirements, negotiating with suppliers and building business relationships.

- We have Frameworks in place for schools to purchase from directly, saving time and money.

- We ensure all schools are compliant with the latest legislation and procurement laws.
